

About “Portable toilet”

English／英語

In case of disaster, a secure toilet is as important as food and water. “Portable toilet”, which solidifies excrements with coagulant, will be useful. Also, the municipal collects them as combustible waste. This can be used for stool at home or in an evacuation shelter. Storing portable toilets at home will help you in disaster.

How to use “Portable toilet” <illustration>

①

Open the bag and put into the stool.

②

Cover the toilet seat with the bag.

③

After use, put on the coagulant uniformly.

④

After solidifying, remove all the air from the bag and fasten tight.
